Platform Engineer (AWS)
Feb. 2025 - Current

- All-in-one: **Platform / AWS Cloud Engineer & Solutions Architect**
- Tech Stack: [macOS | **AWS CDK** | TypeScript | OpenTofu | Python3 | PyCharm | GitHub CoPilot | </> **Boto3** | Git | AWS CLI | Shell (Bash) Scripting | Docker | AWS ECR | Jira | Confluence]
- Led the architecture of a new centralized **AWS CDK** infrastructure, consolidating **Infrastructure as Code (IaC)** from multiple application repos into a single GitHub repository.
- Designed robust, reusable CDK (L3) construct classes (extending L2/L1 constructs) to simplify CDK stack definitions, enabling rapid provisioning of new infrastructure stacks.
- Challenges: Ensuring the new IaC repository was modular & maintainable to support multiple environments across multiple AWS accounts, while adhering to best practices for security, compliance, and cost optimisation.

DevOps Engineer
Nov. 2021 - Feb. 2025

- All-in-one: **Cloud Engineer / Solutions Architect / DevOps**
- Tech Stack: [macOS | **AWS CDK** | Python3 | PyCharm | </> **Boto3** | Git | AWS CLI | Shell (Bash) Scripting | Docker | AWS ECR | MySQL | Bitbucket | Jira | Confluence]
- Led the company's migration of cloud resources from Azure to AWS.
- Implemented a new **Infrastructure as Code (IaC)** process using **AWS CDK**.
- Development/provisioning of new cloud resources (via IaC and/or scripts) to support multiple active projects.
- Oversee all **Continuous Integration/Continuous Delivery (CI/CD)** processes.
- Provide internal support to technical team members using cloud resources.
- Solely architected and implemented new IaC for an in-house **Satellite Data Acquisition System**, for serving live satellite data to company products.
